## 1 .GENERAL DESCRIPTION

### 1. GENERAL DESCRIPION

The Lift Voice Announcer is a dedicated, high-fidelity floor announcement system. It notifies the passengers the name or/and the number of the current floor with a human voice. It also plays background music. In addition, special messages may be broadcast notifying the passenger about the travel direction, the door status and more. Good sound quality, background MP3 music, an embedded SD card memory storage along with a built-in gong, multiple languages and other features make this lift announcer an autonomous voice playback unit. All inputs are user configurable. The firmware could be upgraded on site.

A user-friendly mobile application **LVA APP**  , designed by S. & A.S. Ltd, can be used to configure this unit according to customer needs.

### 1.1 MAIN FEATURES

- High quality voice announcements of floor information and special messages.
- Background MP3 music.
- Embedded 8GB SD Card memory for storage of music tracks.
- Supports USB memory stick for music play.<sup>①</sup>
- Multiple language announcements.
- Multiple male and female voices.
- Can be interfaced with Gray, Binary, 7-segment and CAN inputs.
- 13 configurable inputs.
- Backup power to play a message at power failure.
- Mobile application **LVA APP**  available for LVA configuration.
- Enhanced volume management capabilities.
- Separate Volume Control for Announcements and background music.
- Build-in Gong

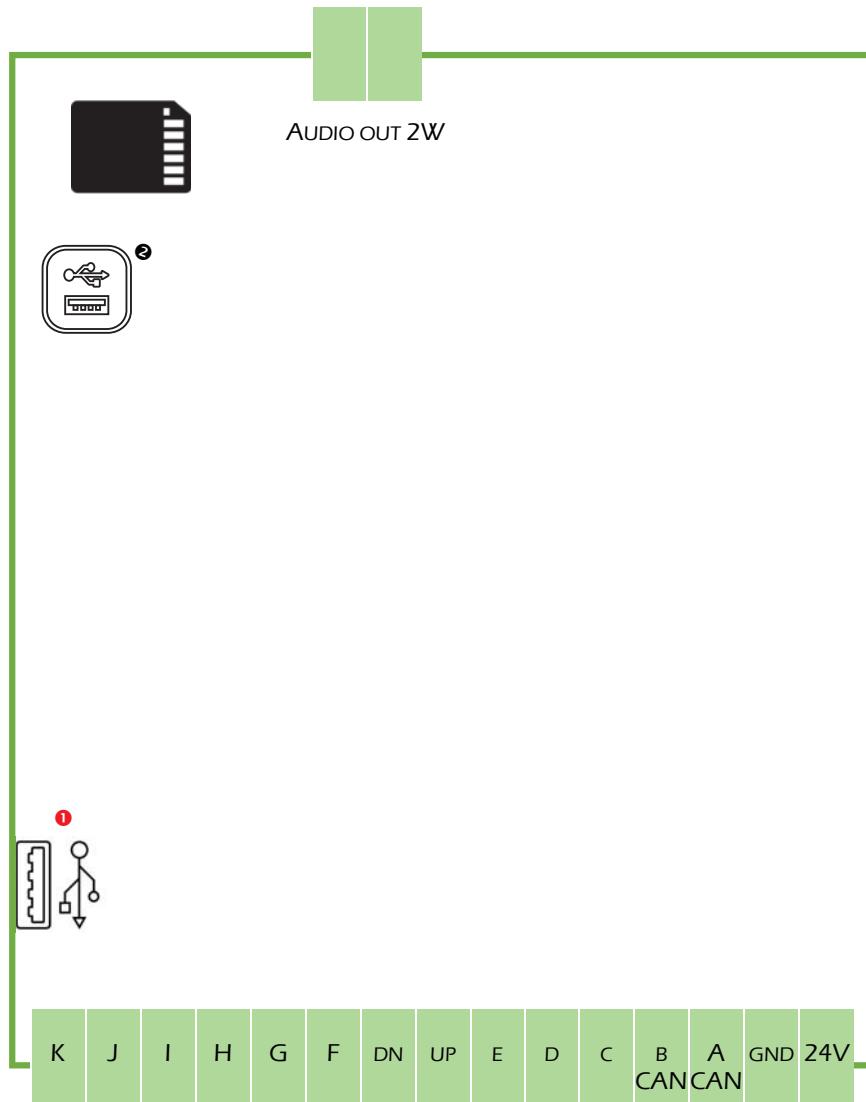

### 1.2 TECHNICAL DATA

Supply voltages	Board supply: 24vdc +15% -25%
Current Consumption	Low current consumption (<100mA)
Inputs	A,B,C,D,E,F,G,H,I,J,K Inputs active voltage level is 24vdc UP, DN Inputs active voltage level is 0vdc
Audio Output	External Speaker (4Ω, 2.2W) or (8Ω, 1.4W)
Connection	Screw type, plug-in connectors
Size	11cm x 8cm x 4 cm

<sup>①</sup>If USB memory stick is plugged in, LVA plays only mp3 music files stored in the USB memory stick under //music folder.  
Otherwise, LVA plays mp3 music files stored in the SD card.

## 2. TERMINAL DESCRIPTION

### 2.1 CONTROL TERMINAL

① This port is used to play music from a USB memory stick instead of the micro SD card.

② This port is used for firmware upgrading and for configuration via mobile application.

## 2. TERMINAL DESCRIPTION

### 2.2 INPUT TERMINALS

#### 2.2.1 FOR INDICATOR TYPE SET TO "ENHANCED"

Input	Description
24V	Supply voltage – positive side +24Vdc
GND	Supply voltage - negative side
A/CAN	Floor information A for Enhanced code interface Active High
B/CAN	Floor information B for Gray/Binary code interface Active High
C	Floor information C for Gray/Binary code interface Active High
D	Floor information D for Gray/Binary code interface Active High
E	Floor information E for Gray/Binary code interface Active High
UP	Going Up Input Active Low
DN	Going Down Input Active Low
F	Door Zone Input Active High
G	Door is Closing Input Active High
H	Door is Opening Input Active High
I	Evacuation Input Active High
J	Out of Service Input Active High
K	Ready input Active High

#### 2.2.2 FOR INDICATOR TYPE SET TO "GRAY" OR "BINARY"

Input	Description
24V	Supply voltage – positive side +24Vdc
GND	Supply voltage – negative side
A/CAN	Floor information A for Gray/Binary code interface Active High
B/CAN	Floor information B for Gray/Binary code interface Active High
C	Floor information C for Gray/Binary code interface Active High
D	Floor information D for Gray/Binary code interface Active High
E	Floor information E for Gray/Binary code interface Active High

Input	Description
UP	Going Up Input Active Low
DN	Going Down Input Active Low
F	Slowing down Input Active High
G	Door is Closing Input Active High
H	Door is Opening Input Active High
I	Evacuation Input Active High
J	Out of Service Input Active High
K	Ready input Active High

### 2.2.3 FOR INDICATOR TYPE SET TO “7-SEGMENT”

Input	Description
24V	Supply voltage - positive side +24Vdc
GND	Supply voltage - negative side
A /CAN	Floor information A for 7-segment code interface Active High
B /CAN	Floor information B for 7-segment code interface Active High
C	Floor information C for 7-segment code interface Active High
D	Floor information D for 7-segment code interface Active High
E	Floor information E for 7-segment code interface Active High
UP	Going Up Input Active Low
DN	Going Down Input Active Low
F	Floor information F for 7-segment code interface Active High
G	Floor information G for 7-segment code interface Active High
H	Door is closing Input Active High
I	Door is opening Input Active High
J	Slowing down Input Active Low
K	Ready input Active High
